

Overview

The MPE-FXS 240 protection module was developed exclusively for the EBS-FXS 240 to protect the equipment from atmospheric discharges and electrical power surges that can hit equipment extensions. With a compact design, and directly attached to the EBS-FXS 240, the equipment makes installation simple and eliminates visual pollution, making a series of connections and cables linked to the individual units unnecessary.

Characteristics and Benefits

The MPE-FXS 240 has 3 stages of protection and highly reliable technology:

- Ultra fast operation with solid state parallel protection.
- Serial protection with resettable fuses for disengaging lines.
- Primary protection with a multiple operating gas-filled surge arrester.

- 50-Wire Centronics Connector
- Dimensions: 132 x 126 x 25mm

Guarantees and Certifications

- Factory warranty 1 year
- ISO 9001:2008 Industry certified
