- Module for standard 1U x 19" rack
- 2m cable for Centronics connection (sold separately)

Models

- 24 ports
- 48 ports

Overview

Khomp Patch Panels were developed to work in conjunction with the EBS-FXS 240 and EBS-FXO HI products in the conversion of Centronics-type inputs to RJ12 outputs. This way, with one patch panel it is possible to convert 1 Centronics input into 24 RJ12 ports on the 24-port model, or also 2 Centronics connectors to 48 RJ12 ports, on the 48 port model.
