

Strobe Light SIP

Principal features

- Indicates with light signal (strobe light) a possible alert, call or some action that should be taken
- Calls the attention of users even in environments with high noise level
- Perfect integration with Asterisk®
- **P** - Power over Ethernet (POE 802.3af)

Applications

- IP strobe for security systems with long range luminous alert

General vision

The Strobe Light SIP is a high brightness SIP Endpoint Strobe Light from Khomp. It is a VoIP device with embedded intelligence, combining agility, security and autonomy. It has option for use in PoE networks. The system has a friendly Web interface for device configuration and monitoring, and can be configured to register on SIP platforms, point-to-point connections or via HTTP command requests.

With all these options, the Strobe Light SIP is an important tool for various integration scenarios via SIP, providing a wide range of aggregations, including possible associations for IoT requests.

Technical specifications

Technical features

- High brightness LED (2 W, 12 v)
- DTMF or SIP Notify
- LAN / PBX-IP SIP integration with internal Web Interface generator server for configuration
- Integration with RESTFUL API for events and HTTP commands
- VoIP protocols used: SIP
- DTMF detection and generation (RFC 2833 standard)

Physical/Environmental

- Power supply: 12 VDC
- Developed for indoor environments
- Installation mode: Overlap
- Dimensions (LxWxH): 100x60x140 mm

Functions

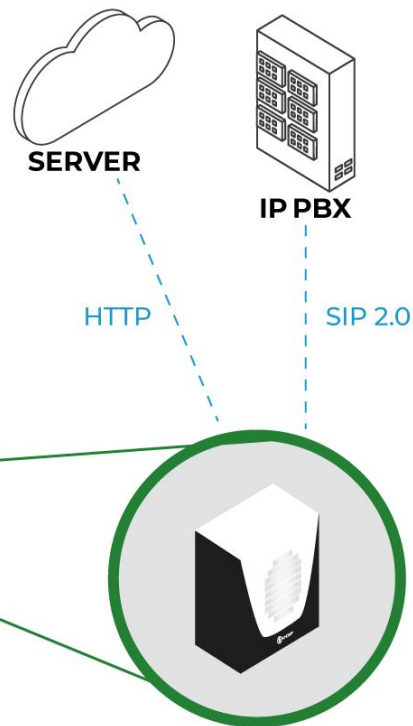

- Indicates with light signal (strobe) a possible call or action that should be taken
- Syslog Service
- Integration with IP Telephony Systems
- Use in PoE (Power over Ethernet) networks

Warranties and certifications

- Total warranty (legal + Khomp warranty): 1 year
- Legal warranty: 90 days
- Khomp warranty: 9 months
- ISO 9001 industry certified

Application templates

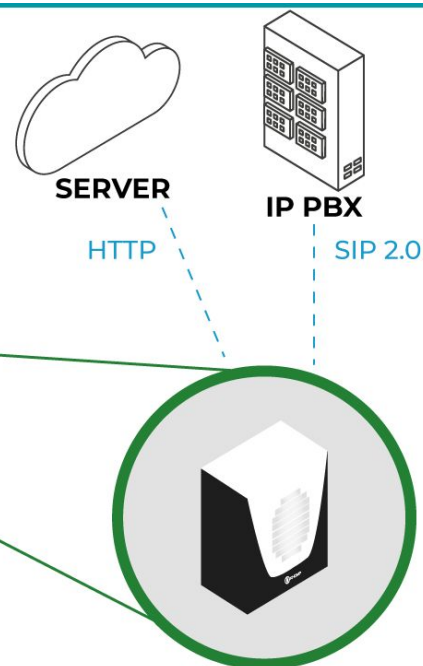

Strobe Light SIP

The device has a **light alert** to indicate that some action must be taken

SIP Strobe Light installed in a factory - noisy environment.

Strobe Light SIP

The device has a **light alert** to indicate that the patient needs some help

SIP Strobe Light installed in a hospital - noiseless environment.
